Volume 191 1990

Table of contents

No. 1 1–256 issued on July 20, 1990
No. 2 257–530 issued on July 31, 1990
No. 3 531–782 issued on August 17, 1990

Information for Authors 777–782

Corrections 775

Reviews

Translational dynamics — Interactions between the translational factors, tRNA and ribosomes during eukaryotic protein synthesis
O. Nygård and L. Nilsson 1– 17

Translation and regulation of translation in the yeast *Saccharomyces cerevisiae*
P. P. Müller and H. Trachsel 257–261

Nucleic acids, protein synthesis and molecular genetics

Repeat peptide motifs which contain β-turns and modulate DNA condensation in chromatin
M. Erard, F. Lakhdar-Ghazal and F. Amalric 19– 26

Human fibroblasts show expression of the leukotriene-A_4-hydrolase gene, which is increased after simian-virus-40 transformation
J. F. Medina, C. Barrios, C. D. Funk, O. Larsson, J. Haeggström and O. Rådmark 27– 31

Inactivation of bacteriophage T7 DNA-dependent RNA polymerase by 5′-*p*-fluorosulfonylbenzoyladenosine — Identification of the modification site and the effect of the modification on enzyme action
V. L. Tunitskaya, A. Kh. Akbarov, S. V. Luchin, L. V. Memelova, V. O. Rechinsky and S. N. Kochetkov 99–103

DNA linking potential generated by gyrase
S. A. Kozyavkin, A. I. Slesarev, S. R. Malkhosyan and I. G. Panyutin 105–113

Yeast homoserine kinase — Characteristics of the corresponding gene, *THR1*, and the purified enzyme, and evolutionary relationships with other enzymes of threonine metabolism
G. Mannhaupt, H.-D. Pohlenz, A. K. Seefluth, U. Pilz and H. Feldmann 115–122

Valyl-tRNA synthetase from yeast — Discrimination between 20 amino acids in aminoacylation of $tRNA^{Val}$-C-C-A and $tRNA^{Val}$-C-C-A(3′NH_2)
W. Freist and F. Cramer 123–129

Structural analysis of the human inter-α-trypsin inhibitor light-chain gene
M. Diarra-Mehrpour, J. Bourguignon, R. Sesboüé, J.-P. Salier, T. Leveillard and J.-P. Martin 131–139

A ^{19}F-NMR study of 3-fluoro-4-demethoxy-daunomycin intercalation complexes with the hexanucleotide d$(CTGCAG)_2$
B. C. Hammer, R. A. Russell, R. N. Warrener and J. G. Collins 307–313

Nucleotide sequence, organisation and structural analysis of the products of genes in the *nirB*–*cysG* region of the *Escherichia coli* K-12 chromosome
T. Peakman, J. Crouzet, J. F. Mayaux, S. Busby, S. Mohan, N. Harborne, J. Wootton, R. Nicolson and J. Cole 315–323

Transcriptional control of the *cysG* gene of *Escherichia coli* K-12 during aerobic and anaerobic growth
T. Peakman, S. Busby and J. Cole 325–331

Isolation and physical properties of the DNA-directed RNA polymerase from *Thermus thermophilus* HB8
S. Wnendt, R. K. Hartmann, N. Ulbrich and V. A. Erdmann 467–472

Molecular cloning and nucleotide sequence of full-length cDNA for ascorbate oxidase from cultured pumpkin cells
M. Esaka, T. Hattori, K. Fujisawa, S. Sakajo and T. Asahi 537–541

Expression in *Escherichia coli* of ferredoxin:$NADP^+$ reductase from spinach — Bacterial synthesis of the holoflavoprotein and of an active enzyme form lacking the first 28 amino acid residues of the sequence
A. Aliverti, T. Jansen, G. Zanetti, S. Ronchi, R. G. Herrmann and B. Curti 551–555

Molecular cloning of a cDNA for the smallest nuclear-encoded subunit of sweet potato cytochrome *c* oxidase — Analysis with the cDNA of the structure and import into mitochondria of the subunit
T. Nakagawa, M. Maeshima, K. Nakamura and T. Asahi 557–561

Characterisation of tissue-specific *trans*-acting factor binding to a proximal element in the rat growth hormone gene promoter
S. Larkin, S. Tait, M. Treacy and F. Martin 605–615

Revised nomenclature for eukaryotic DNA polymerases
P. M. J. Burgers, R. A. Bambara, J. L. Campbell, L. M. S. Chang, K. M. Downey, U. Hübscher, M. Y. W. T. Lee, S. M. Linn, A. G. So and S. Spadari 617–618

A novel gene member of the human glycophorin A and B gene family — Molecular cloning and expression
A. Vignal, C. Rahuel, J. London, B. Cherif Zahar, S. Schaff, C. Hattab, Y. Okubo and J.-P. Cartron 619–625

Structure of the arylsulfatase A gene
J. Kreysing, K. von Figura and V. Gieselmann 627–631

Effect of polyamines on the activity of malarial α-like DNA polymerase
U. Bachrach and L. Abu-Elheiga 633–637

Functional properties of phosphorylated elongation factor 2
U. Carlberg, A. Nilsson and O. Nygård 639–645

Effect of mRNA secondary structure on the efficiency of translational initiation by eukaryotic ribosomes
P. Roy, S. B. Rondeau, C. Vézina and G. Boileau 647–652

Protein chemistry and structure

Isolation and characterization of a tumor-derived human protein related to chromogranin A and its *in vitro* conversion to human pancreastatin-48
H. Tamamura, M. Ohta, K. Yoshizawa, Y. Ono, A. Eunakoshi, K. Miyasaka, K. Tatoishi, A. Jimi, H. Yajima, N. Fujii and S. Funakoshi 33– 39

The H^+-induced dissociation of human plasma α_2-macroglobulin — An investigation using small-angle neutron scattering and test of trypsin binding activity
S. Pap, B. Sjöberg and K. Mortensen 41– 45

Tooth 'enamelins' identified mainly as serum proteins — Major 'enamelin' is albumin
E. Strawich and M. J. Glimcher 47– 56

Immune recognition of affinity-labelled cholecystokinin receptor
M. Dufresne, S. Poirot, J. Jimenez, J.-C. Cuber, N. Vaysse and D. Fourmy 141–146

Two-dimensional NMR studies on des-pentapeptide-insulin — Proton resonance assignments and secondary structure analysis
R. Boelens, M. L. Ganadu, P. Verheyden and R. Kaptein 147–153

Solution NMR studies of colicin E1 C-terminal thermolytic peptide — Structural comparison with colicin A and the effects of pH changes
M. R. Wormald, A. R. Merrill, W. A. Cramer and R. J. P. Williams 155–161

Relationship between protein/solvent proton exchange and progressive conformation and fluctuation changes in hemoglobin
S. El Antri, O. Sire and B. Alpert 163–168

The measurement of the rotational diffusion coefficient of bovine plasma fibronectin by electric birefringence technique
L. Vuillard, B. Roux and A. Miller 333–336

Cloning and sequence analysis of the genes encoding the α and β subunits of the E1 component of the pyruvate dehydrogenase multienzyme complex of *Bacillus stearothermophilus*
C. F. Hawkins, A. Borges and R. N. Perham 337–346

Recognition of different nucleotide-binding sites in primary structures using a property-pattern approach
P. Bork and C. Grunwald 347–358

Molecular characterization of nuclear basic protein HPI1, a putative precursor of human sperm protamines HP2 and HP3
A. Martinage, A. Arkhis, E. Alimi, P. Sautière and P. Chevaillier 449–451

Structural requirements for signal transduction of the insulin receptor
R.-R. Flörke, H. W. Klein and H. Reinauer 473–482

Cell adhesion, spreading and neurite stimulation by laminin fragment E8 depends on maintenance of secondary and tertiary structure in its rod and globular domain
R. Deutzmann, M. Aumailley, H. Wiedemann, W. Pysny, R. Timpl and D. Edgar 513–522

Flavin-photosensitized oxidation of reduced *c*-type cytochromes — Reaction mechanism and comparison with photoreduction of oxidized cytochromes by flavin semiquinones
M. Roncel, M. Hervás, J. A. Navarro, M. A. De la Rosa and G. Tollin 531–536

Primary structure of human placental 5′-nucleotidase and identification of the glycolipid anchor in the mature form
Y. Misumi, S. Ogata, K. Ohkubo, S. Hirose and Y. Ikehara 563–569

Conformational changes in intact and papain-modified α_1-proteinase inhibitor induced by guanidinium chloride
M. Hervé and G. Ghélis 653–658

The ^{1}H-NMR assignments of the aromatic resonances in complexes of *Lactobacillus casei* dihydrofolate reductase and the origins of their chemical shifts
B. Birdsall, J. R. P. Arnold, J. Jimenez-Barbero, T. A. Frenkiel, C. J. Bauer, S. J. B. Tendler, M. D. Carr, J. A. Thomas, G. C. K. Roberts and J. Feeney 659–668

Enzymology

Purification and characterization of an (ADP-ribose)$_n$ glycohydrolase from human erythrocytes
S. Tanuma and H. Endo 57– 63

Acceptor specificity and tissue distribution of three human α-3-fucosyltransferases
R. Mollicone, A. Gibaud, A. François, M. Ratcliffe and R. Oriol 169–176

Biochemical and genetic analysis of a maltopentaose-producing amylase from an alkaliphilic Gram-positive bacterium
A. Candussio, G. Schmid and A. Böck 177–185

Purification and properties of N^5,N^{10}-methylenetetrahydromethanopterin reductase from *Methanobacterium thermoautotrophicum* (strain Marburg)
K. Ma and R. K. Thauer 187–193

The quaternary structure of *Escherichia coli* inorganic pyrophosphatase is essential for phosphorylation
V. A. Sklyankina and S. M. Avaeva 195–201

Comparison of exonucleolytic activities of herpes simplex virus type-1 DNA polymerase and DNase
C. W. Knopf and K. Weisshart 263–273

Isolation of two high-molecular-mass proteinases from human erythrocytes
P. Sacchetta, S. Santarone, P. Battista and D. Di Cola 275–280

Quinone compounds are able to replace molecular oxygen as terminal electron acceptor in phytoene desaturation in chromoplasts of *Narcissus pseudonarcissus* L.
M. P. Mayer, P. Beyer and H. Kleinig 359–363

2-Aminobenzoyl-CoA monooxygenase/reductase, a novel type of flavoenzyme — Identification of the reaction products
B. Langkau, S. Ghisla, R. Buder, K. Ziegler and G. Fuchs 365–371

The mechanism by which rat liver glucokinase is inhibited by the regulatory protein
A. Vandercammen and E. Van Schaftingen 483–489

Purification and characterization of a ribonuclease from human spleen — Immunological and enzymological comparison with non-secretory ribonuclease from human urine
T. Yasuda, K. Mizuta, W. Sato and K. Kishi 523–529

Phosphorothioate analogs of ATP as the substrates of dynein and ciliary or flagellar movement
T. Shimizu, M. Okuno, S. P. Marchese-Ragona and K. A. Johnson 543–550

Function of oligosaccharide modification in glucocerebrosidase, a membrane-associated lysosomal hydrolase
S. van Weely, J. M. F. G. Aerts, M. B. van Leeuwen, J. C. Heikoop, W. E. Donker-Koopman, J. A. Barranger, J. M. Tager and A. W. Schram 669–677

Kinetic misinterpretation of a coupled enzyme reaction can lead to the assumption of an enzyme–enzyme interaction — The example of 3-phospho-D-glycerate kinase and glyceraldehyde-3-phosphate dehydrogenase couple
M. Vas and J. Batke 679–683

Inhibition of *Clostridium histolyticum* collagenases by phosphonamide peptide inhibitors
V. Dive, A. Yiotakis, A. Nicolaou and F. Toma 685–693

Comparative structural and enzymatic properties of skeletal muscle myosin from neonatal and adult rabbits
M. Houadjeto, J.-J. Bechet and A. d'Albis 695–700

Fructose-1,6-bisphosphate-activated pyruvate kinase from *Escherichia coli* — Nature of bonds involved in the allosteric mechanism
M. L. Speranza, G. Valentini and M. Malcovati 701–704

Purification and characterisation of TOL plasmid-encoded benzyl alcohol dehydrogenase and benzaldehyde dehydrogenase of *Pseudomonas putida*
J. P. Shaw and S. Harayama 705–714

Thermostable alanine dehydrogenase from thermophilic *Bacillus sphaericus* DSM 462 — Purification, characterization and kinetic mechanism
T. Ohshima, M. Sakane, T. Yamazaki and K. Soda 715–720

Carbohydrates, lipids and other natural products

Staphyloferrin A: a structurally new siderophore from staphylococci
S. Konetschny-Rapp, G. Jung, J. Meiwes and H. Zähner 65–74

α1→3-Galactosyltransferase: the use of recombinant enzyme for the synthesis of α-galactosylated glycoconjugates
D. H. Joziasse, N. L. Shaper, L. S. Salyer, D. H. van den Eijnden, A. C. van der Spoel, J. H. Shaper 75–83

Structural investigations and biological activity of inositol sphingophospholipids from *Phytophthora capsici*
O. Lhomme, M. Bruneteau, C. E. Costello, P. Mas, P.-M. Molot, A. Dell, P. R. Tiller and G. Michel 203–209

The influence of glycosylation on the fate of renin expressed in *Xenopus* oocytes
K. Nakayama, K. Hatsuzawa, W.-S. Kim, K. Hashiba, T. Yoshino, H. Hori and K. Murakami 281–285

Structure and biosynthesis of the xylose-containing carbohydrate moiety of rice α-amylase
M. Hayashi, A. Tsuru, T. Mitsui, N. Takahashi, H. Hanzawa, Y. Arata and T. Akazawa 287–295

Peptidoglycan cross-linking in *Staphylococcus aureus* — An apparent random polymerisation process
M. A. Snowden and H. R. Perkins 373–377

Glycosphingolipids in insects — Chemical structures of two variants of a glucuronic-acid-containing ceramide hexasaccharide from a pupae of *Calliphora vicina* (Insecta: Diptera), distinguished by a *N*-acetylglucosamine-bound phosphoethanolamine side-chain
B. Weske, R. D. Dennis, F. Helling, M. Keller, G. A. Nores, J. Peter-Katalinic, H. Egge, U. Dabrowski and H. Wiegandt 379–388

Stereochemical studies on algal pheromone biosynthesis — A model study with the flowering plant *Senecio isatideus* (Asteraceae)
C. Neumann and W. Boland 453–459

Comparison of the carbohydrate-binding specificities of seven *N*-acetyl-D-galactosamine-recognizing lectins
V. Piller, F. Piller and J.-P. Cartron 461–466

Physical and inorganic biochemistry

Comparison of the self-association properties of the 5'-triphosphates of inosine (ITP), guanosine (GTP), and adenosine (ATP) — Further evidence for ionic interactions in the highly stable dimeric $[H_2(ATP)]_2^{4-}$ stack
N. A. Corfù, R. Tribolet and H. Sigel 721–735

Evidence for fast and discriminatory electron transfer of proteins at modified gold electrodes
A. M. Bond, H. A. O. Hill, D. J. Page, I. S. M. Psalti and N. J. Walton 737–742

Escherichia coli DNA polymerase I: inherent exonuclease activities differentiate between monofunctional and bifunctional adducts of DNA and *cis*- or *trans*-diamminedichloroplatinum(II) — An exonuclease investigation of the kinetics of the adduct formation
F. Bernges, G. Dörner and E. Holler 743–753

Membranes and bioenergetics

10,20-Methanorhodopsins: (7*E*,9*E*,13*E*)-10,20-methanorhodopsin and (7*E*,9*Z*,13*Z*)-10,20-methanorhodopsin — 11-*cis*-Locked rhodopsin analog pigments with unusual thermal and photo-stability
W. I. de Grip, J. van Oostrum, P. H. M. Bovee-Geurts, R. van der Steen, L. J. P. van Amsterdam, M. Groesbeek and J. Lugtenburg 211–220

Subcellular distribution of lipoxygenase products in rabbit reticulocyte membranes
H. Kühn, J. Belkner and R. Wiesner 221–227

Investigation into the fluidity of lipopolysaccharide and free lipid A membrane systems by Fourier-transform infrared spectroscopy and differential scanning calorimetry
K. Brandenburg and U. Seydel 229–236

Cytochrome aa_3 from *Sulfolobus acidocaldarius* – A single-subunit, quinol-oxidizing archaebacterial terminal oxidase
S. Anemüller and G. Schäfer 297–305

Localization of membrane-associated (NiFe) and (NiFeSe) hydrogenases of *Desulfovibrio vulgaris* using immunoelectron microscopic procedures
M. Rohde, U. Fürstenau, F. Mayer, A. E. Przybyla, H. D. Peck Jr, J. Le Gall, E. S. Choi and N. K. Menon 389–396

How do MgATP analogues differentially modify high-affinity and low-affinity ATP binding sites of Na^+/K^+-ATPase?
E. H. Serpersu, S. Bunk and W. Schoner 397–404

Metabolism and metabolic regulation

Effect of metabolic alterations on the density and the contents of cathepsins B, H and L of lysosomes in rat macrophages
D. Muno, N. Sutoh, T. Watanabe, Y. Uchiyama and E. Kominami 91– 98

Changes in free and bound forms and total amount of hexokinase isozyme II of rat muscle in response to contractile activity
F. E. Weber and D. Pette 85– 90

Stimulation of glycogen synthesis in hepatocytes by added amino acids is related to the total intracellular content of amino acids
P. J. A. M. Plomp, L. Boon, L. H. P. Caro, G. M. van Woerkom and A. J. Meijer 237–243

Identification and role of the basal phosphorylation site on hormone-sensitive lipase
A. J. Garton and S. J. Yeaman 245–250

Characteristics of sinusoidal uptake and biliary excretion of cysteinyl leukotrienes in perfused rat liver
M. Wettstein, W. Gerok and D. Häussinger 251–255

Covalent modification and metabolic control analysis – Modification to the theorems and their application to metabolic systems containing covalently modifiable enzymes
J. R. Small and D. A. Fell 405–411

Metabolic control analysis – Sensitivity of control coefficients to elasticities
J. R. Small and D. A. Fell 413–420

Rapid turnover of low-density lipoprotein receptor by a non-lysosomal pathway in mouse macrophage J774 cells and inhibitory effect of brefeldin A
S. Shite, T. Seguchi, T. Shimada, M. Ono and M. Kuwano 491–497

Ubiquitin in *Chlamydomonas reinhardii* – Distribution in the cell and effect of heat shock and photoinhibition on its conjugate pattern
M. Wettern, H. A. Parag, L. Pollmann, I. Ohad and R. G. Kulka 571–576

Subcellular distribution of energy metabolites in the pre-ischaemic and post-ischaemic perfused working rat heart
S. M. Humphrey, J. E. Buckman and D. G. Holliss 755–759

Signal transduction and molecular neurobiology

Protein kinase C inhibitor proteins – Purification from sheep brain and sequence similarity to lipocortins and 14-3-3 protein
A. Toker, C. A. Ellis, L. A. Sellers and A. Aitken 421–429

Proteolytic activation of protein kinase C-ε
D. Schaap, J. Hsuan, N. Totty and P. J. Parker 431–435

Purification and characterization of five different α subunits of guanine-nucleotide-binding proteins in bovine brain membranes – Their physiological properties concerning the activities of adenylate cyclase and atrial muscarinic K^+ channels
I. Kobayashi, H. Shibasaki, K. Takahashi, K. Tohyama, Y. Kurachi, H. Ito, M. Ui and T. Katada 499–506

Virus-vs endotoxin-induced activation of liver macrophages
K. J. Busam, A. Homfeld, R. Zawatzky, S. Kästner, J. Bauer, W. Gerok and K. Decker 577–582

Interdependence of tumor necrosis factor, prostaglandin E_2, and protein synthesis in lipopolysaccharide-exposed rat Kupffer cells
T. Peters, U. Karck and K. Decker 583–589

Purification and characterization of bovine brain type I phosphatidylinositol kinase
S. J. Morgan, A. D. Smith and P. J. Parker 761–767

Molecular cell biology

Expression of cytochrome *P*-450 enzymes in cultured human hepatocytes
F. Morel, P. H. Beaune, D. Ratanasavanh, J.-P. Flinois, C. S. Yang, F. P. Guengerich and A. Guillouzo 437–444

Apparently irreversible GTP hydrolysis attends tubulin self-assembly
J. M. Angelastro and D. L. Purich 507–511

Suppression of the 'uncovering' of mannose-6-phosphate residues in lysosomal enzymes in the presence of NH_4Cl
C. Isidoro, J. Radons, F. M. Baccino and A. Hasilik 591–597

Molecular cloning of the gene for the E1α subunit of the pyruvate dehydrogenase complex from *Saccharomyces cerevisiae*
H. de Steensma, L. Holterman, I. Dekker, C. A. van Sluis and T. J. Wenzel 769–774

Developmental biochemistry and immunology

Isolation of a specific granulopoiesis inhibitor from calf spleen and identification as glutathione
J. Fetsch, K. Eckart and H. R. Maurer 445–448

Phorbol esters induce differentiation of U-937 human promonocytic cells in the absence of LFA-1/ICAM-1-mediated intercellular adhesion
C. Cabañas, F. Sanchez-Madrid, P. Aller, E. Yague and C. Bernabeu 599–604
